

IOWA STATE UNIVERSITY

Department of Materials Science and Engineering

What does DESIGN mean?

solving problems
answering questions
characterization
modeling/calculation
iterative design
analysis
recommendations for optimization
evaluation
development
synthesis
process

What are the BENEFITS to our company?

students provide **insight** into existing problems

students and faculty mentor offer **specialized knowledge**

students provide **man power and time** for projects that may otherwise be put on hold

engage with students as **potential employees**

have access to **equipment and expertise** not available at your own site

visibility of your organization on campus

provides a **gateway for a broader relationship** with MSE

What have other projects been?

characterization of material properties and understanding of **direct laser sintering**

investigating the **corrosion behavior in lead-free solders**

determining **mechanical properties** of maraging steel produced by **selective laser melting**

determining dependence of **physical properties of soluble glasses on synthesis route**

rapid prototyping of polyactic acid crystal models

What should we do if we are interested?

Contact:
Martha Selby
mselby@iastate.edu
515-294-0195

fill out a **'Project Information Sheet'** with contact information, project description, resources, deliverables, interest area, and financial commitment

Determine **project objectives and criteria**

Recent senior design business partners include:

Emerson/Fiser Controls | Metalcraft, Inc. | Honeywell | 3M | Ervin Industries | Ozonics Hunting SAFI-Tech | John Deere | Rockwell Collins | Stellar Industries | Wilson Trailer

How does it work?

- This is a 2 semester course, offered in both fall and spring semester.
- It is an industry sponsored project.
- There are teams of 3-4 students and 1 faculty mentor.
- Students work 10-15 hours/week or 500-700 man hour effort in total.
- A \$1000 financial committment as a reimbursement for itemized costs is required and company approval is required before a group can go over that dollar amount.
- Companies must provide resources such as samples, supplies, or specialized equipment.
- An engineer within the company should be assigned as primary point of contact.
- Consider student travel to the company or a company visit to Iowa State University.
- Companies should provide deliverables such as reports/analyses, prototypes, models, data, etc.
- A non-disclosure agreement form is available in cases where confidential information is handled.
- There is also an agreement to assign any intellectual property to your company as desired.
