

Bridging the Technology Gap

August 29, 2012

"We are developing into a two-tier society: a full life for those who can cope with modern technology but a second-class, deprived life for those who can't." - P.D. James, British author

To those trained in science and engineering, today's rapid advances in technology are generally deemed an exciting cavalcade of progress that steadily better the human condition. But to those less familiar with science and engineering, those same technological advances can seem bewildering and even threatening.
