

## Rising Materials Engineering Enrollment

**December 17, 2012**

MSE alumni “of a certain age” will remember that their ceramic engineering and metallurgical engineering classes tended to be small, and most of their fellow students were male. Thirty or 40 years ago, the materials departments had the smallest student numbers in the College of Engineering. Materials classes were often comprised of only eight or 10 students, and it wasn’t unusual for every one of those students to be male.
